# CyberCrime@Octopus

# **Project summary**

Project title:	CyberCrime@Octopus (DG1/3021)
Project area:	Parties and observers to the Budapest Convention on Cybercrime Other States prepared to implement the Budapest Convention
Duration:	36 months (1 January 2014 – 31 December 2016)
Budget:	Up to EURO 1.8 million
Funding:	<ul> <li>Voluntary contributions from</li> <li>Parties and observers to the Budapest Convention on Cybercrime</li> <li>Other public and private sector organisations</li> </ul>

Implementation: Data Protection and Cybercrime Division, DG1, Council of Europe

# BACKGROUND AND JUSTIFICATION

While the threat of cybercrime continues to increase, progress has been made in international cooperation against cybercrime. The Budapest Convention is considered to play an important role not only with respect to strengthening legislation and criminal justice action but in triggering a broad commitment by governments, international organisations and public as well as private sector stakeholders to cooperate against cybercrime.

In 2012 and 2013, the Budapest Convention received broader political support and enlarged its membership. The Cybercrime Convention Committee (T-CY) assumed a stronger role, among other things by preparing Guidance Note as well as working on solutions for transborder access to data. In 2012, the T-CY began to assess implementation of the Convention by the Parties. A first cycle was completed by December 2012 and a second cycle focusing on the efficiency of international cooperation is being carried out in 2013. This will further enhance the impact of this treaty. In June 2013, the T-CY decided that the Committee should be co-funded by voluntary contributions to the present project.

Technical assistance projects helped strengthen criminal justice capacities on the basis of the Budapest Convention and related instruments on data protection (Convention 108) and the protection of children against sexual violence online (Lanzarote Convention). The annual Octopus conferences on cooperation against cybercrime continue to attract a large number of stakeholders from all over the world.

The present project will build on the Global Project on Cybercrime (Phases 1 - 3) under which hundreds of activities were supported since 2006. Its primary focus will be:

- 1. To ensure the organisation of the annual Octopus conferences.
- 2. To co-fund and support the functioning of the Cybercrime Convention Committee with its enlarged membership, functions and number of meetings.
- 3. To provide advice and other assistance to countries which are prepared to implement the Budapest Convention and related instruments on data protection and the protection of children.
